Summary

Technologist driven by deep enthusiasm for computer systems and digital innovation. My background is quite diverse ranging from English teaching to advanced photography. My career evolves around a simple goal: understanding how things work and making them better. Continuously learning, focused on software development and industrial robotics.

Languages

Español

Inglés
Conversational

Skills

</> Frontend & UI

React, JavaScript, TypeScript, Tailwind CSS

{ } Backend & Data

Node.js, PHP, MySQL

🔧 Automation & Engineering

Python, PLC Programming, Git

Experience

Freelance

Web Developer

Jardín América, Mnes.

Nov 2024 - Present

- **Cloud-Native Workflow Automation:** Architected the migration of a legacy desktop-based automation system (InDesign/ExtendScript) to a modern, web-based PDF-as-Code engine, using high-performance technologies (React, TypeScript) to dynamically generate and merge large-scale catalogs (500+ products) from CSV data sources.
- **E-commerce & Web Development:** Developing and maintaining e-commerce platforms and websites, including payment gateway integrations such as Mercado Pago.
- **CMS Optimization & UX:** Executing technical and aesthetic optimizations for CMS platforms (WordPress/WooCommerce), leveraging PHP for custom feature development and CSS/HTML to refine the overall User Experience.
- **End-to-End Project Management:** Managing full-cycle digital projects for diverse clients, including In Bloom, Wappa, and Corchazo (Music Industry), overseeing the entire workflow from initial design to final deployment.
- **Visual Asset Post-Production:** Handling technical image processing, post-production and design via Inkscape, Adobe Lightroom, Illustrator among others.

DataAnnotation

QA and RLHF

Remote

Jan 2026 - Present

- Training and improvement of artificial intelligence models.
- Analysis of AI-generated information.
- Evaluation of multimodal models, including comprehensive image analysis and validation of visual content.
- Quality control and auditing of LLM-generated responses through meticulous evaluation processes.
- Data classification, sentiment analysis, and validation of the logical structure of information provided by the models.
- Assessed language naturalness and accuracy in bilingual environments (English/Spanish).
- Generated detailed reports and feedback for algorithmic refinement and bias prevention.

Freelance

Jardín América, Mnes.

Photographer & Visual Content Creator

Feb 2023 - Present

- Photographic production focused on commercial, urban, and event-based content. My work joins technical photography and aesthetic judgment, ensuring every asset aligns with my clients goals.
- Product & Commercial Photography: Creation of visual assets for online stores, optimizing brand identity through high-quality imagery.
- Event Coverage & Lifestyle Sessions: Management of lighting and composition in dynamic environments, delivering professional results under demanding conditions.

In Bloom

Jardín América, Mnes.

Co-founder & Web Developer

2021 - Present

- I carried out the digital transformation of this apparel brand, balancing technical execution with business growth. I led the end-to-end development of our e-commerce infrastructure.
- E-commerce Infrastructure: Designed and deployed the full-cycle e-commerce website using WordPress and WooCommerce, integrating secure payment gateways like Mercado Pago.
- Technical Optimization: Developed custom features and refined site architecture using PHP, and HTML/CSS to improve performance and user experience.
- Digital Brand Identity: Managed the comprehensive brand strategy, including UI/UX design, photography, and visual content creation using design software as Adobe Illustrator and Lightroom, among others.
- Inventory Management: Oversaw the technical management of product catalogs, ensuring data integrity across the platform.

Education

Universidad de Defensa Nacional (FADENA)

Bachelor of Science

Cyberdefense

Argentina • 2026-Present

Actively pursuing a degree in Cyber Defense to complement my background in automation and full-stack development. Relevant coursework includes operating systems security, and networking fundamentals.

Escuela Provincial de Educación Técnica N°7

Associate Degree

Automation and Robotics

Jardín América, Mnes. • 2023 - Present

Advanced technical training in the design, implementation, and maintenance of automated industrial systems. Focused on **PLC logic programming** and industrial robotics. Sensor integration, electrical circuit design, and electromechanical troubleshooting to optimize production efficiency.

Escuela Provincial de Educación Técnica N°7

Associate Degree

Electromechanical Design and Assembly

Jardín América, Mnes. • 2023 - Present

Advanced technical training focused on the full lifecycle of industrial equipment. **Electromechanical design**, technical blueprint interpretation, and professional assembly. Integration of mechanical structures with electrical power systems.

Certifications

- **Intensive Specialization Certificate, React.js Development & Frontend Technologies** 2023

Government of the City of Buenos Aires (Codo a Codo 4.0)

Intensive frontend development program focused on building web applications using React.js. The curriculum covered core concepts including Hooks, State Management and Component Architecture following modern JavaScript (ES6+) standards.
- **Full Stack Web Development Certificate (JavaScript/Node.js)** 2022

Government of the City of Buenos Aires (Codo a Codo 4.0)

Intensive professional training program focused on Full Stack Development. Focused on JavaScript and Node.js, covering both frontend and backend architecture.
- **B2 First Certificate in English (FCE)** 2022

Cambridge University

Upper-Intermediate (B2) level according to CEFR. This certification validates my ability to write detailed reports, participate in technical discussions, and articulate complex ideas clearly in both written and spoken English.
